Expert Reviews:

Edmunds.com: Excellent build quality, good fuel economy and palatable starting prices make the 2013 Acura ILX an intriguing option for those who'd like a luxury car without the big payment.

newCarTestDrive.com: The Acura ILX is a new nameplate for Honda's upscale division, a front-wheel-drive compact sedan conceived to give potential buyers an entry into the premium car class at sub-luxury prices.

KBB.com: Although the ILX is small and light like a Civic, its interior layout looks far more sophisticated and the cabin is beefed up to drown out the outside noise, which makes for an overall more pleasant driving experience.

CarAndDriver.com: It's based on the Honda Civic but fortunately doesn't look or feel like that's the case; the interior is much nicer, the styling is well tailored, and the gauges don't look like they belong in a spaceship.

JDPower.com Power Circle Ratings

Power Circle Ratings (the Ratings) are developed by J.D. Power and Associates for JDPower.com. All Ratings are based on the opinions of consumers who have actually used or owned the product or service being rated. Since the Ratings are based on J.D. Power and Associates research studies that survey a representative sample of owners, they are indicative of what typical buyers may experience.

High ratings for a particular product/service/company do not necessarily mean that every customer will have a positive experience. It simply indicates that, on average, consumer perceptions of the product/service/company indicate that it stands out when compared with competitive products/services/companies.
