Expert Reviews:

Edmunds.com: Affordable, composed handling on- and off-road, high crash test scores.

newCarTestDrive.com: A properly equipped Colorado is rated to tow 4,000 pounds, enough for transporting ATVs, dirt bikes, personal watercraft, bass boats, and small camping trailers. For most people, the Colorado is more than enough truck to get the job done.

KBB.com: The Colorado's greatest strengths can be found in its chassis and powertrains. The body-on-frame chassis provides a rigid platform helping eliminate rattles and shake. You can feel it in the way the Colorado handles off-road and in the corners.

JDPower.com Power Circle Ratings

Power Circle Ratings (the Ratings) are developed by J.D. Power and Associates for JDPower.com. All Ratings are based on the opinions of consumers who have actually used or owned the product or service being rated. Since the Ratings are based on J.D. Power and Associates research studies that survey a representative sample of owners, they are indicative of what typical buyers may experience.

High ratings for a particular product/service/company do not necessarily mean that every customer will have a positive experience. It simply indicates that, on average, consumer perceptions of the product/service/company indicate that it stands out when compared with competitive products/services/companies.
