Expert Reviews:

Edmunds.com: The midsize ute is powered by the largest and most powerful V6 ever to grace an Acura, giving it unparalleled juice and athleticism. A dual-stage intake manifold and a very high compression ratio allow this engine to perform like a V8, while retaining the fuel-efficiency of a V6.

newCarTestDrive.com: The Acura MDX benefits from a completely new platform, suspension, and unit-construction body with a built-in frame and subframes front and rear. The MDX is really stout, some 15 percent stronger in torsional bending and seven percent stronger in lateral bending.

KBB.com: By combining manageable dimensions with seven-passenger capacity, a comfortable highway ride with responsive in-town handling and car-like construction with respectable off-pavement capability, the MDX has been one of our favorite SUVs since its introduction

ConsumerReports.org: The Acura MDX is a well-rounded, seven-seat SUV that outscores vehicles costing thousands more. We liked its refined powertrain, quick acceleration, responsive handling, and controlled ride. We found the interior fit and finish impressive and the front- and second-row seats comfortable.

JDPower.com Power Circle Ratings

Power Circle Ratings (the Ratings) are developed by J.D. Power and Associates for JDPower.com. All Ratings are based on the opinions of consumers who have actually used or owned the product or service being rated. Since the Ratings are based on J.D. Power and Associates research studies that survey a representative sample of owners, they are indicative of what typical buyers may experience.

High ratings for a particular product/service/company do not necessarily mean that every customer will have a positive experience. It simply indicates that, on average, consumer perceptions of the product/service/company indicate that it stands out when compared with competitive products/services/companies.
