Expert Reviews:

Edmunds.com: offers a unique combination of good looks, SUV-grade ground clearance and a midsize car's handling characteristics -- as opposed to the supposedly "carlike handling" of 4,500-pound crossovers

newCarTestDrive.com: Reasonable prices, operating economy and a penchant for charging through snow make Outbacks a favorite in wintry weather. But they also do very well with potholes in the Midwest and deserts in the Southwest.

KBB.com: Outback takes Subaru's four-wheel-drive philosophy one step further by increasing ground clearance, adding protective side cladding and offering a host of accessories designed to carry various types of equipment and cargo.

ConsumerReports.org: Fit and finish is excellent. Thin roof pillars and large windows make blind zones small. The front seats are supportive and the rear has enough room for two adults.

JDPower.com Power Circle Ratings

Power Circle Ratings (the Ratings) are developed by J.D. Power and Associates for JDPower.com. All Ratings are based on the opinions of consumers who have actually used or owned the product or service being rated. Since the Ratings are based on J.D. Power and Associates research studies that survey a representative sample of owners, they are indicative of what typical buyers may experience.

High ratings for a particular product/service/company do not necessarily mean that every customer will have a positive experience. It simply indicates that, on average, consumer perceptions of the product/service/company indicate that it stands out when compared with competitive products/services/companies.
